

Promote rooftop solar energy nationwide

Overview

The Climate Change Committee(CCC) is an independent group of experts who advise the government on how to reduce our carbon emissions. It recommends that 54GW of solar capacity is needed by 2035. Indeed, the UK government has now set an even more ambitious target of 70 GW of solar energy by 2035. CPRE. Both for new buildings and for retrofits, we support a 'fabric first' approach. This approach focuses on minimising energy use before turning to renewable energy generation. However, solar is a great option for fitting to the. Then there are car parks. Covering land with tarmac and storing cars on it has no place in 21st century land-use policies. Sure, cars need to be. As part of our campaign, we are calling on the government to unleash a rooftop revolution by urgently taking these steps: 1. Managing the potential. We're running a campaign to urge the government to fully realise the potential of solar on rooftops and other 'grey' spaces. From warehouses to.

Article Content

Putting solar panels on rooftops can generate the ...

Putting solar panels on rooftops across the country, especially in North and East Yorkshire, can help us to generate the clean electricity we need, while cutting our carbon emissions and sparing land for food, farming and nature. But how ...
