

Solar Power Panel Timer

Overview

The 12V DC solar panel timer is designed to manage the operating times of any devices connected to the system. This ensures that the power generated doesn't get drained as any devices that aren't needed aren't running. Before we get into this, you need to know that a solar timer does not control power generation. An AC timer is connected to the AC power supply and is often positioned in the DB Board and connected to devices that need to be managed to optimize. Using the buttons on the timer to set which days you want the device(s) to run and the on and off times is about as easy as putting a contact number into your phone. Most timers are digital and have a battery backup to keep the timer. Using a timer with your solar PV system will help you manage connected devices and maximize the energy usage from your batteries and panels. Installing a timer with your solar system is the.
