

What are the specifications and sizes of solar panels

Overview

As you can imagine, you can get almost any size solar panel you desire, from single tiles to ones that cover the entire roof. There are even companies that will craft custom and bespoke solar panels for your roof. The majority of solar panels for sale in the UK average around 350 watts (W) in power for residential units. However, it's quite easy to get your hands on more powerful solar panels, often. Below we have detailed some of the most common solar panel installations in the UK for different property types. If you have a small home or want to power mobile vehicles like caravans and campervans, the good news is that there are many smaller-sized systems available. This includes small systems. If you have a large roof or want to provide a significant amount of power to your property, then large solar panels are also available. For domestic applications, solar panels can be purchased in various sizes and configurations.
